

Shima Masaeli

Junior Front End Developer

I'm Shima, a diligent podcaster who loves learning new things. I'm passionate about the world of programming and web development, and I'm eager to learn more. I started learning Python a couple of years ago, and I've also used R for data science. However, I was particularly fascinated by Python's power in web crawling. Then, I became familiar with the world of web development, and I've built a personal CV website and a shopping website to practice. I'm currently learning React. and I'm eager to learn more about front-end libraries like React and TypeScript language. My goal is to become an experienced front-end developer in the next 3-5 years. I'm looking for a mentor who can help me learn and grow faster. I appreciate someone who can guide me, give me feedbacks, and help me stay motivated. I'm confident that I can make a significant contribution to the field of programming and web development.

WORK EXPERIENCE:

Khore Ketab (Self-employed) - Developer & Content Creator

2020 - Present (3 yrs 4 mos)

- A passion for engaging in deep discussions on Liberty and promoting critical thinking
- Site Developer
- Publishing episodes with RSS
- Web crawling for getting relevant data

Related Skills: Python · Web Crawling

Shopping Book Website

Jul 2023 - Present

- a responsive website to continue practicing some new techniques like how to build a mock-API,
- how to retrieve data from database file and show it on the front side of the web,
- how to build functional filter and search bars.
- got familiar with what SQL is, what it is used for, and some of it's necessary syntax
- also designed a landing page with a functional star rating box.
- It is not complete. To complete it, I need to learn how JavaScript can be used for infinite loading on scroll, and authentication.

IT SKILLS:

Python: Intermediary level

R: Basic level

SEO: Intermediary level

Adobe Photoshop: Basic level

INTEREST:

I have expressed my passion for “liberty” through my podcast and website, "Khore Ketab" (a Persian term and a politer meaning for book worm!) for 3 years until today. This thought-provoking book podcast goes beyond the surface level, exploring the concept of liberty from various perspectives, including psychological, historical, economic, literary, and political philosophy aspects. I love engaging in deep discussions and promoting liberty and critical thinking among my audience. Since I can't choose between the worlds of technology and literature, I do both!
